

COURSE DESCRIPTION

DCAMCUT Solo

The training course DCAMCUT Solo consists of 5 days, including 3 days of SolidWorks skills:

- Day 1:**
- Basics in EDMCAD (SolidWorks)
 - Explanation of the user interface
 - Control options
 - Basics of sketching using examples with detailed design notes
 - Basics of modeling using examples with detailed design notes
 - Installation instructions for the DCAMCUT software (if necessary, installation demonstration)
- Day 2:**
- Broadening of the learned skills, generation of more sophisticated models with only fewer design notes
 - Layers generation
 - Generation of the user-defined Coordinate System
 - Insight into the assembly generation
- Day 3:**
- Introduction to DCAMCUT
 - Explanation of the EDM-specific functions in the user interface
 - Program creation for 2D-designs
 - Explanation of the 2D-specific functions
- Day 4:**
- Program creation for 3D models
 - Explanation of the 3D-specific functions
- Day 5:**
- Application examples for special functions (e.g. transformation, statistics)
 - Template Generation
